## PROFESSIONAL SUMMARY

Computer Science and Engineering student specializing in Internet of Things, with a foundation in Java, Python, web development, and Spring technologies. Interested in building practical software solutions and creating clear, user-focused interfaces.

## EDUCATION

**Netaji Subhash Engineering College** **2024 – 2028**
B.Tech in Computer Science and Engineering (Internet of Things)

## PROJECTS

**Grade Compass | MAKAUT Grade Calculator** **Personal Project**

- **Built from scratch:** student-focused academic calculator for MAKAUT marks tracking and semester exam planning.
- **Grade planning:** calculates internal marks and estimates the End-Semester Examination score needed to reach target grades.

Project: GitHub repository

**Nagar Sudhar | Civic Issue Reporting System** **Smart India Hackathon 2025**

- **Team project:** civic issue reporting system for the Smart India Hackathon.

Project links: Dashboard | Source

**Unnati Portal** **Smart India Hackathon 2026**

- **Platform:** connects village challenges with engineering student projects, CSR funding, and state monitoring.
- **Features:** lets citizens and village representatives report local issues; supports student-led project development.

Project: GitHub repository

## ACHIEVEMENTS

- **Ranked 4th** in the internal Smart India Hackathon 2025 selection with the Nagar Sudhar civic issue reporting system.
- **Participated** in Smart India Hackathon 2026 with the Unnati Portal project.
- **Top 20** at Hackatron 3.0, organized by BIT Sindri.

## TECHNICAL SKILLS

- C
- Java
- Python
- PHP
- Data Structures and Algorithms (Java)
- HTML
- CSS
- JavaScript
- React
- Tailwind CSS
- Spring
- UI/UX Design
- Git
- GitHub
- Visual Studio Code
- IntelliJ IDEA

- Spring Boot
- Microservices

## LANGUAGES
